

MTestJapan.com Consumer Physical InfoPack

(Sample AA Honey)

Project Name: Australian natural honey survey 17Sep2012 v1-2

Customer: Australia Anytime Honey Pty., Ltd.

Completed by: Export Manager, Head Office

Audience: Consumer Physical Testing

Document: Info Sheet Data (supplied by AA Honey for Consumer's reference)

Digital Assets Information:

1. List of questions Consumer will be asked

*(Where indicated *, questions are fixed format – those not so marked, may be replaced by questions of your choice for a total of 12 questions. Additional free format questions come at additional cost – visit MTestJapan.com for pricing.)*

- [✓] Evaluation of product positioning statement*
- [✓] Internal packaging physical appearance (quality, materials used, attractiveness, etc.)
- [✓] Internal packaging text and directions comments*
- [✓] Contents physical qualities (flow, clarity, consistency, etc.)
- [✓] Contents taste evaluation
- [✓] Physical size and weight of product*
- [✓] Packaging functionality evaluation*
- [✓] Suggested pricing*
- [✓] Suitability of product as a gift*
- [✓] Will consumers buy directly online?
- [✓] Competition*
- [✓] *Your question, up to 50 words* [If we were to offer product online for sale from Australia to Japanese consumers, would they be interested in buying it?]

2. Maker's product positioning statement

(Your comments should refer to positioning of product in home market, who buys it naturally, why, how you are better than the competition, how you see the product fitting in the Japanese market, etc.)

AA honey is a genuine natural Australian food product, sourced directly from apiarists harvesting the honey. It is heated at low temperature to preserve its natural qualities and flavor. The product is not listed as organic, as our apiarists are unable to certify that all sources of nectar are organically grown. However, we note that we do not harvest within 50km of major areas of manufacturing.

The audience for AA honey is people who appreciate the unique taste of Stringy Bark and Mallee tree flowers. The taste is distinctive of Australian bush honies. Generally people prepared to pay a premium for such tastes are already honey consumers and are looking to experience something different.

3. Internal container text and directions

(Be sure to type in all relevant information – no photos – to facilitate translation. Consultants will refer to this text information in conjunction with the photos that you supply.)

Our honey is produced in open country areas where everything remains natural. We extract it without extra heat, to conserve the aroma and flavor. Every batch will vary slightly. It may crystallize quickly, but that's proof it's OK. Warm it gently in the sun, the bottle is designed for that purpose, or stand it in hot water. There is no need to refrigerate our honey.

Discover
Australian Honey
This honey is from Red Stringybark hardwood trees on the foothills of mountains in NSW. Big white blossoms yield rich smooth nectar, that creates a delicious result. It's ideal on toast, breakfast cereal, as a marinade, and of course, with ice cream for dessert. Bound to become a favorite.

4. Details on physical size and weight of product

Measure	Value	Comments
Weight filled	500gm	
Height	130mm	To top of cap
Front side width	90mm	
Flat side depth	65mm	Non-beveled side

5. Packaging functionality comments/photos

Dispensing honey is easy. Simply open the cap, place the honey over the target and squeeze from the beveled (narrowest) side of the bottle. AA Honey has a membrane in the cap which will cleanly cut off the honey flow when pressure is released from the bottle. This prevents drips and leakage.

6. Special certificates, marks, properties of product

- [None]

7. Suggested pricing

(Indicate pricing in your home market, and desired pricing in Japan.)

- Australia (home market) – Retail is AUD10 per 500gm bottle
- Japan – minimum retail suggested at JPY1,000 per 500gm bottle

8. Product availability direct from Australia

- [No, our website is down for reconstruction.]
